

ABERDEEN MALL

We are closely monitoring the COVID-19 outbreak, in particular the potential impact within our local community. There is nothing more important than maintaining a safe environment, and we will be taking all necessary precautions for the well-being of our entire shopping center community. This includes following guidelines provided by the Centers for Disease Control (CDC), the World Health Organization (WHO) and our local Department of Health.

Mall Hours Update

Effective Tuesday, March 17, 2020 the shopping center will operate between 11am and 7pm every day except for Sunday, when the hours are noon to 6pm., until further notice. Please ensure that your delivery companies are aware of the change in hours so you will continue to receive your shipments on schedule.

Store Hours

We remain committed to supporting the operations of our retailers. We recognize that retailers and the theater may implement their own corporate policies regarding modified hours or temporary store closures. Please make sure to check the restaurant or store hours prior to visiting.

Events

All events have been canceled including The Easter Bunny. This includes all common area events, outdoor events and activities, until further notice.

Here are the steps we are taking

- The CDC guidelines on workplace cleanliness include an increased frequency of cleaning highly touchable areas throughout a property. We are disinfecting high traffic areas within the center and parking garages.
- As an extra precaution, we are working with our housekeeping vendors to increase the frequency and intensity of cleaning touchable surfaces using a strong disinfectant known to eradicate viruses.
- We continue to monitor the situation and the government's response. If there is a confirmed case of COVID-19 at the shopping center, we will alert the community and work with local, state and federal health officials to ensure an appropriate plan is in place to help diminish the spread of the virus.

Here is what you can do to stay healthy

- Wash hands frequently with soap and water for a minimum of 20 seconds
- Avoid touching eyes, nose or mouth with unwashed hands
- Avoid close contact with people who are sick
- If you do become sick with respiratory symptoms such as fever and cough, please stay away from work, school or other people to avoid spreading the illness
- Keep a safe distance from others
